Profile

Full-stack software engineer with expertise in ASP.NET Core and SQL Server, expanding frontend capabilities through React development. Detail-oriented problem-solver with experience in building, testing, and maintaining complex applications, including responsive, bilingual interfaces and integrated booking systems with calendar synchronisation and third-party API integrations.

Professional Experience

Freelance Software Developer
Nozol Chalets
Technologies: ASP.NET 8 MVC, Entity Framework Core, SQL Server, Razor Pages, Bootstrap

- Built a full-stack reservation system handling 80+ monthly bookings using ASP.NET Core 8, Entity Framework, and SQL Server
- Implemented availability logic with manual overrides and Booking.com ⌐ iCal calendar synchronisation
- Created a responsive bilingual interface (Arabic/English) with messaging (SMS/WhatsApp) and payment processing
- Developed a comprehensive admin panel for reservations, operational workflows, and system monitoring
- Ensured reliability through debugging and validation of critical booking workflows
